WHAT AUREX IS

A referral-driven yield protocol on BNB Smart Chain. Members deposit USDT, **earn a fixed daily return** on that deposit, and earn additional income from the network they build beneath them.

Everything runs as **smart-contract code** on a **public blockchain**.

There is no back office deciding who gets paid what — the rules are written into contracts that anyone can read, and they execute identically for everyone.

A member's balance, **their team, their rank and their earnings** are all on-chain facts, verifiable by the member themselves.

The product has **five ways to earn**, described in Section 04. Four of them reward building a team; one rewards simply having deposited. All five draw from the same lifetime cap, so a member's total return is bounded and predictable.

THE MEMBER JOURNEY, IN FIVE STEPS

#	STEP		WHAT HAPPENS
	1	Join by referral	A member must be introduced by an existing member. The referrer is recorded permanently and cannot be changed.
	2	Deposit	A minimum of \$100 USDT, in whole \$100 steps. This creates a stream — an individual investment with its own 200-day clock.
	3	Earn daily	1% of that deposit accrues every day for 200 days, paid in ARX.
	4	Build a team	Referrals unlock deeper level income, rank progression, and eventually the infinity bonus.
	5	Withdraw or re-topup	Earnings can be claimed at any time. New deposits create new independent streams , each with a fresh 200-day clock.

WHY CHOOSE US?

Built on Innovation. **Driven by Trust.** Powered by Community.

AI-POWERED INNOVATION

Harnessing the power of AI to drive smarter decisions and real-world solutions.

BLOCKCHAIN TRANSPARENCY

100% transparent and auditable blockchain for complete trust and accountability.

FAST & SECURE TRANSACTIONS

Lightning-fast, secure and seamless transactions you can rely on.

COMMUNITY-DRIVEN ECOSYSTEM

Built by the community, for the community.
Together we grow stronger.

SMART CONTRACT INFRASTRUCTURE

Robust and secure smart contracts ensuring reliability and automation.

SCALABLE DIGITAL ARCHITECTURE

Designed for massive growth with a scalable and future-ready infrastructure.

AUREX SYSTEM ADVANTAGES

POWERED BY BLOCKCHAIN • DRIVEN BY CODE • BUILT FOR FREEDOM

Fully Decentralized System

Fully Automated Execution

Transparent Smart Contract

Unlimited Recycles / Re-Entry

Instant Transactions

No Withdraw Charges

No Hidden Charges

No Admin Control

No Owner Control

No Company Dependency

Immutable Blockchain Code

Unlimited Earning Potential

Self-Sustained Reward Cycle

No Human Interference

Code-Based Fair Distribution

Anti-Manipulation Mechanism

Real-Time Dashboard

Built on Blockchain. Automated by Code. Designed for Transparency, Security & Sustainable Growth.

THE ARX TOKEN

ARX is the protocol's own BEP-20 token. Its most important marketing property is what **it doesn't do**: there is no mint function, no transaction tax, no blacklist and no trading lock. The supply is fixed forever at the moment of deployment.

PROPERTY	VALUE
 Name / symbol	Aurex · ARX
 Standard	BEP-20, burnable
 Decimals	18
 Total supply	2,000,000 ARX
 Minting	Impossible after launch
 Transfer tax	None
 Restrictions	None whatsoever
 Reference price	0.05 \$
 Listing	PancakeSwap Listing

WHY “NO MINT FUNCTION” MATTERS

Most yield tokens can be inflated by their creators. ARX cannot — the ability to create new tokens does not exist in the code. Two million is the number, permanently. This is a genuinely strong, verifiable claim and it should feature prominently in the brochure.

SUPPLY ALLOCATION

Owner allocation 1,900,000 **95%**

Liquidity reserve 100,000 **5%**

Both allocations are minted **once**, at deployment, and the mint capability is then permanently unavailable.

TOKEN ROADMAP

1

PHASE 1 LAUNCH DAY

- Smart Contract Deployment
- Decentralised Exchange Listing
- Liquidity Initialisation
- Community Launch

2

PHASE 2 ECOSYSTEM GROWTH

- Community Expansion
- Strategic Partnerships
- Token Utility Expansion
- Ecosystem Development

3

PHASE 3 AI INTEGRATION

- AI-Based Features
- Platform Enhancements
- User Experience Improvements
- Infrastructure Scaling

4

PHASE 4 GLOBAL EXPANSION

- Cross-Ecosystem Collaborations
- Advanced Technology Rollout
- Governance Enhancements
- Long-Term Ecosystem Development

03

Flow of Funds

WHERE THE MONEY GOES

Every deposit is split three ways the instant it arrives.

The percentages are set in the contract configuration, not decided case by case.

35%
LIQUIDITY

Reserved to build and deepen the ARX/USDT trading pool on PancakeSwap. Tracked as a dedicated reserve and deployed to the pool by the liquidity module.

10%
COMPANY

Transferred *instantly*, at the moment of deposit, straight to the company wallet. It never enters the protocol treasury.

55%
REWARDS

Held in the treasury to fund all income streams — referral, level, rank and infinity payouts.

**WHAT THIS MEANS
FOR THE STORY**

The **35% liquidity allocation** is the most marketable part of this split: a fixed, automatic, contract-enforced share of every single deposit goes toward supporting the token's own market. It is not a promise made in a whitepaper — it is a line of code that runs on every transaction.

FUTURE UTILITIES

Powered by **Aurex**

Aurex drives innovation with **AI**, **NFTs**, **certificates**, and **blockchain utilities** for tomorrow's ecosystem.

AI TOOLS

- ◆ Intelligent automation for trading, analytics, and portfolio insights.
- ◆ AI-driven recommendations to guide smarter investment decisions.
- ◆ Predictive modeling for market trends and risk management.

NFT BADGES

- ◆ Digital badges to recognize achievements, ranks, and exclusive memberships.
- ◆ Gamification elements that strengthen community engagement.
- ◆ Unique, tradable assets showcasing user status and loyalty.

CERTIFICATES

- ◆ Blockchain-secured certificates ensuring authenticity and trust.
- ◆ Applications in education, training, and proof of participation.
- ◆ Immutable records that enhance credibility and transparency.

ADDITIONAL BLOCKCHAIN UTILITIES

- ◆ Smart contracts for rewards, governance, and automation.
- ◆ Decentralized identity verification for secure access.
- ◆ Cross-chain integrations to expand Aurex's ecosystem reach.

EMPOWERING — THE FUTURE: — STRATEGIC BUSINESS PLAN

Driving **innovation**, **sustainability**, and **growth** through visionary strategies that transform challenges into **opportunities**.

FIVE WAYS TO EARN.

One rewards depositing.
Four reward building.
All five share a single
lifetime ceiling.

THE FIVE INCOME STREAMS

These five mechanics are the product.
Everything else in this document exists to support, fund or constrain them.

STREAM
01

DAILY ROI

1% /DAY

PAID IN ARX

The foundation. Every deposit earns **1% of its own value every day for 200 days** — a total of 200% of the deposit, which is exactly the standard lifetime cap. A member who never refers anyone still doubles their deposit over the full term, provided they hold to the end.

Each deposit is a **separate stream** with its own clock and its own frozen terms. A member with three deposits has three independent 200-day schedules running in parallel. Critically, the rate and duration are **frozen at the moment of purchase** — if the protocol later changes its rates, existing deposits keep the terms they were bought under. This is a strong trust message.

RATE
1.00% DAILY

DURATION

PAID IN
ARX, VALUED IN USDT

TERMS
FROZEN AT PURCHASE

THE ARX PAYOUT MECHANIC – EXPLAIN THIS CAREFULLY

Daily ROI is **calculated in USDT** but **paid in ARX**. Each stream locks in an ARX price when it is created, and the daily reward converts at that locked price. The USDT value is what counts toward the lifetime cap and appears in statistics; the ARX amount is what actually arrives in the wallet. All four other streams pay in USDT. Members claim both tokens in a single transaction.

STREAM 02

DIRECT REFERRAL

12%

PAID IN USDT

When someone a member personally introduced makes a deposit, that member immediately receives **12% of it**.

There is no qualification requirement, no waiting period and no cap on how many directs a member may have. It is the fastest and simplest income in the system.

This is also level 1. The level-income table below starts at level 2 precisely because level 1 is already paid here. Never present them as two separate earnings on the same deposit — that would overstate the payout by 12 points.

14	1.0%	Band 3
15	0.5%	Band 3
L2-L15	27.5%	Level walk total

HOW LEVELS UNLOCK

Unlocking is driven by single deposits made by the team, not by cumulative volume. A member is counted once per band, on the first deposit that reaches it.

BAND 1 – LEVELS 1 TO 5

One level per direct

Each personally referred member who deposits **\$100 or more** unlocks one level, up to five. Five qualified directs unlocks all five levels.

BAND 2 – LEVELS 6 TO 10

5 + 25 at \$250

Requires **5 members** on level 1 and **25** on level 2, each having made a single deposit of **\$250 or more**.

BAND 3 – LEVELS 11 TO 15

5 + 25 at \$500

The same 5 + 25 team structure, but at a **\$500** single-deposit threshold.

COPY GUIDANCE

“Up to 39.5% paid across fifteen levels” is accurate and compelling — but it must always carry the qualifier **when fully unlocked**. Most members will never unlock all fifteen.

STREAM
04

RANK BONUS

(The Weekly Bonus)

\$30 - \$2M

PAID IN USDT

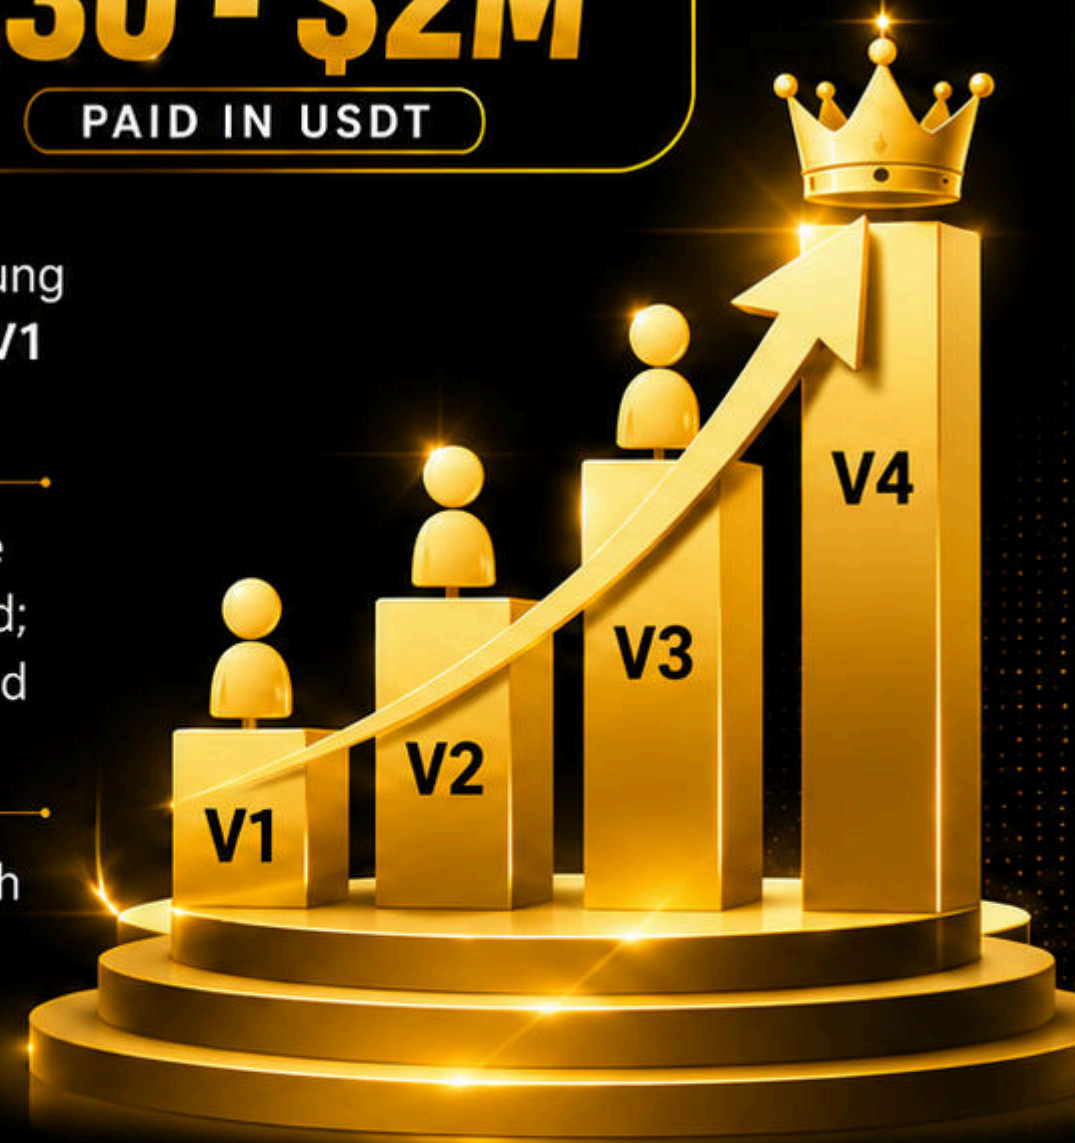

The leadership reward. As a member's organisation grows, they climb a fourteen-rung ladder from **V1 to V14**. Each rank reached pays a fixed cash bonus — from **\$30** at **V1** to **\$2,000,000** at **V14**.

Rank is measured on **matching business**, not total volume. The protocol looks at the member's strongest referral leg and compares it against all their other legs combined; the smaller of the two is their matching business. This delivers truly rewards balanced team-building rather than a single lucky recruit.

Each bonus is split into **four equal installments** paid **Every 7 days** — roughly a month to collect in full. Once a cycle is exhausted it can renew: both the power leg and the weaker legs must each contribute **15%** of the rank's threshold in new business (**30% combined**), and the four installments begin again.

STREAM
05

INFINITY BONUS

THE ELITE REWARD. THE STRONGEST REASON TO PURSUE RANK.

4%

PAID IN USDT

The elite reward, and the strongest single reason to pursue rank. On reaching **V8**, a member begins earning **4% of every deposit** made anywhere beneath them — at unlimited depth, not capped to fifteen levels.

The mechanic is precise: for any deposit, the protocol walks upward and finds the nearest **V8-or-above** achiever. That person earns the **4%**. The **next** achiever above them earns a **20%-share** of that bonus. This keeps senior leaders earning from the depth of their organisation without paying the same 4% many times over.

UNLOCKS AT
RANK V8

RATE
4%
of each deposit

DEPTH
UNLIMITED*

UPLINE SHARE
20%
to next achiever

THE ONE ASTERISK ON “UNLIMITED”

Upward traversal is bounded at **100 ancestors** per transaction as a gas-safety measure — a technical necessity on any blockchain, not an economic limit. In practice on real organisations that approach 100 levels of depth, “Unlimited depth” is fair to say; if a technically literate audience challenges it, the honest answer is “**bounded at 100 levels for transaction-safety reasons.**”

05

PROGRESSION

★★★

THE RANK LADDER

Fourteen ranks. The first ten are earned on **matching business**; the last four are earned by **developing other leaders**.

EVERY BONUS IS PAID IN **FOUR INSTALLMENTS, 7 DAYS APART**.

RANK	MATCHING BUSINESS	BONUS	PER INSTALLMENT	
			AMOUNT	REQUIREMENT
V1	\$600	\$30	\$7.50	Matching business threshold
V2	\$2,500	\$100	\$25	Matching business threshold
V3	\$5,000	\$250	\$62.50	Matching business threshold
V4	\$10,000	\$500	\$125	Matching business threshold
V5	\$20,000	\$1,000	\$250	Matching business threshold
V6	\$50,000	\$2,500	\$625	Matching business threshold
V7	\$100,000	\$5,000	\$1,250	Matching business threshold
V8	\$500,000	\$25,000	\$6,250	Unlocks infinity bonus + 3x cap ∞
V9	\$1,000,000	\$50,000	\$12,500	Matching business threshold
V10	\$2,000,000	\$100,000	\$25,000	Matching business threshold
V11	—	\$250,000	\$62,500	3 × V9 in 3 different legs
V12	—	\$500,000	\$125,000	3 × V10 in 3 different legs
V13	—	\$1,000,000	\$250,000	3 × V11 in 3 different legs
V14	—	\$2,000,000	\$500,000	3 × V12 in 3 different legs

MATCHING BUSINESS – HOW IT IS CALCULATED

A member's referral tree divides into legs — one per direct referral. The protocol tracks total deposit volume in each leg, then computes:

MATCHING BUSINESS =
the smaller of (strongest leg)
and (all other legs combined)

A member with \$1M in one leg and \$50k everywhere else has **\$50k** of matching business — rank **V6**. Balance is the point.

CYCLE RENEWAL

A rank bonus is not once-and-done. When the four installments of a cycle have been collected, that rank can pay again — but only after the organisation has genuinely grown.

The power leg must add **15%** of the rank's matching threshold in new business, and

The weaker legs combined must add **15%** as well.

That is **30% of the threshold in new business** to restart a cycle. Each renewal advances the measurement baseline, so the same volume can never be used to renew twice.

NOTE

For V11–V14, which have no matching threshold of their own, renewal is measured against **V10's \$2,000,000** base.

LIMITS, CAPS AND RULES

These constraints protect the protocol's solvency. They are also, handled well, a trust asset — a system with a hard ceiling is a system that has thought about its own sustainability.

THE LIFETIME EARNINGS CAP

This is the single most important rule in the entire protocol. **All five income streams draw from one combined lifetime ceiling.** Once a member has earned that multiple of what they deposited, earnings stop — regardless of which stream they came from.

STANDARD — UNRANKED THROUGH V7

200% · 2x

A \$1,000 deposit can return a maximum of \$2,000 across ROI, referral, level, rank and infinity income combined.

BOOSTED — RANK V8 AND ABOVE

300% · 3x

Reaching V8 lifts the ceiling by half again. The same \$1,000 deposit can now return \$3,000. The boost applies automatically.

WHY THIS MATTERS TO THE STORY

Note the arithmetic: daily ROI alone pays exactly 200% over its 200 days. For a member at the standard cap, ROI is the whole cap — every referral dollar they earn simply gets them there faster. Reaching V8 is what creates genuine headroom above the ROI. This is the honest strategic argument for building a team, and it is far more persuasive than stacking percentages.
